9.2 TIME CONTROLS (CO/TC)

The purpose of the Time Control (CO/TC) is to outline the areas in which the route of the competition is divided, in order to regulate the conduct of the same and to make sure the average speed is respected.

Each competitor (even when 3 cars a minute have been planned for) must be measured on the minute (e.g. for transit time 14:01 it will be possible to transit without penalty from 14:01:00 to 14:01:59).

The excesses as regards the ideal times established will determine the classification.

Penalties for delays and early arrivals at a CO/TC are those stated in Article 11.1.1 of these SR.

Delays and early arrivals at a CO/TC must not be caught up in the next CO/TC. Teams must leave the "check area" free for transit. They are authorised to enter this area on board their car, in the minute preceding the ideal one for transit, and remain in the area for the time strictly necessary to record the transit time.

When the time is being read, the car must be inside the time reading area.

During reading operations, at least one member of the team must be on board the competition car.

The time used for the reading operation is not neutralised in any way. The reading is taken at the moment in which one member of the team hands over the Time Card to the Time-keeper.

In the case where competition cars that are late or in advance of their ideal times transit through the CO/TC in the minute pertaining to cars on time, the Time-keeper will make a note, on the Time Card of the team that is late or in advance, of the real transit time, which corresponds to the start of the next sector, giving precedence, in the marking operations, to the team with the less delay on the ideal transit time.

All the CO/TCs will be appropriately marked with signs in compliance with the examples attached to these SR (Appendix 6).

Vehicles transiting through an OC/TC in the opposite direction or a direction other than the one decided by the organiser will be excluded from the race.

9.3 TIME TRIALS (PC/TT)

Time Trials (PC/TT) are those timed areas of the route, between two consecutive readings where the drivers must keep to a set time indicated in the Itinerary Table and in the Time Card.

Readings will be done at 1/100th of a second without any tolerance. Differences in the ideal time will, as for the differences read at CO/TC, be used in determining the classification.

PC/TT will be undertaken with departure read at free entrance; the driver will be able to choose freely the start of the PC, nonetheless within approx. 5 seconds from the "all clear" given by the Marshals and/or the Timekeeper in charge.

Various consecutive PC/TTs will be envisaged (interconnected), where the time for passing to the final reading of the previous PC/TT will be the start time of the next PC/TT, and so forth.

For PC/TT located in equipped areas or temporary circuits, competition tracks, kart-racing tracks, and for PC/TTs with lengths less than 300m, an appropriate map will be attached with the Road Book.

All PC/TTs will be properly marked both at the start and at the end, with signs in compliance with the examples attached to these SR (Appendix 6).

In the area of the route between the yellow sign and the beige sign showing the start and end of the measuring area, cars are not allowed to park, stop or open the doors. Should any cars stop in this measuring area due to a breakdown, they must be immediately removed according to the instructions given by the competition official, on penalty of exclusion. Furthermore, unauthorised access by drivers and navigators is also forbidden.

Vehicles transiting through a PC/TC area in the opposite direction than the one decided by the organiser will be excluded from the race.

In the case of absence of a reading by a competitor, or even the absence of a result by one or more PC/TT, irrespective of the reason for this, the competitor will always be assigned a time relating to the missing PC/TT as resulting from the average PC/TT actually clocked by the said competitor in the

Laps where the PC/TT are missing. The request will be made at the end of the Lap under consideration.

9.4 AVERAGE TRIALS (PM/AT)

Average Trials (PM/AT) are those areas of the route within a sector, where drivers must keep to a set hourly average, stated in the Itinerary Table and the Time Card.

For each PM / AT, for the purposes of classification of the trial, all the detections carried out be considered, then proceeding to the calculation of the average penalty.

The Road book will state the start area and the place of the maximum real limit of end of the PM/AT.

In the area from the start to the end of the PM/AT, the average is taken at one or more points not known to the driver.

The Itinerary Plan will state the number of readings envisaged for each PM/AT. Every Average Trial could plan up to 5 readings.

The passage time is read in front of the timekeeper, in seconds, manually, with writing equipment.

9.4.1 START OF AVERAGE TRIALS

- a. the start time of the PM/AT is free and coincides with the passage on the pressure gauge on the start line;
- b. the transit time on the pressure gauge will be lapped manually by the Time-keepers assigned for the purpose, will measured to the second lapsed.

9.5 PASSAGE CONTROLS (CT/PC)

The purpose of the Passage Controls (CT/PC) is to check the strict adherence to the established route.

The opening and closing times of the CT/PC will be notified by the Clerk of the course Bulletin. At the CT/PCs, drivers must stop the cars in order for the check stamp or "all clear" stamp to be printed in the relative area of the Time Card. The absence of this stamp will mean exclusion.

All the CT/PC areas will be properly marked with signs in compliance with the examples attached to these SR (Appendix 6).

Vehicles transiting through a CT/PC area in the opposite direction or one other than the one decided by the Organiser will be excluded from the race.

9.6 ARRIVAL

Arrival check will be in Brescia – Piazzale Iveco and will be open from 15:30 on Saturday 18 May 2019.

After the arrival CO/TC, competitors will proceed following the instructions given by Marshals, to the arrival ramp.

Article 10 - MAXIMUM LATENESS

A crew will be over the maximum lateness:

- if it transits through a Time Control (CO/TC) with more than 30 minutes delay.
- if it accumulates delays through various Time Controls totalling more than 60 minutes delay.

Only at the starting CO/TC of each Leg will a crew be considered over the maximum time limit if they transit with more than 15 minutes of delay.

The opening and closing times of the Time Trials (PC/TT), the Average Trials (PM / AT) and of the Print Checks (CT /CP) will be notified through a Clerk of the course Bulletin.
