CROSSING  
THE FUTURE

With 1000 Miglia 2022, the **1000 Miglia Green** also returns, a regularity race over 1.700 km long reserved for a small number of Hyper cars, Supercars and Brand Premium Full-electric.

Crossing the Future: cars built between 1927 and 1957, which represented the inventiveness and technological innovation of their time, alongside alternative fuel models, representing the future of mobility.

CROSSING  
THE FUTURE

The sporting challenge is unique: travelling along the entire route from Brescia to Rome and back, for the first time in a regularity race, recharging the batteries in compliance with the times and the scheduled checkpoints and concluding the leg by parading on the main walkways.

# THE ROUTE

With Brescia as the point of departure and arrival, **1000 Miglia Green 2022** will follow the official route of the fortieth re-enactment of 1000 Miglia, crossing through hundreds of the most fascinating places in Italy.

Divided into **4 legs**, the route includes a part of the race route (around 300 km) and additional free transfer sectors to allow the crews to organize recharging in complete autonomy.

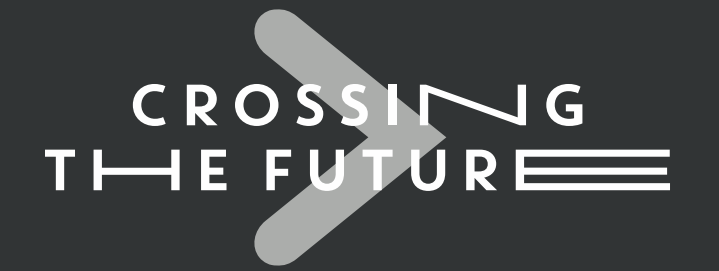

1<sup>st</sup> Leg

WEDNESDAY 15 JUNE

» [Brescia / Ferrara / Cervia - Milano Marittima](#)

# GREEN TALK

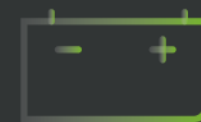

For the fourth consecutive year, 1000 Miglia is organizing the **GREEN TALK** dedicated to sustainable mobility.

"Green Talk" is the initiative created by 1000 Miglia in collaboration with the Fondazione Symbola, to represent the Italian supply chain of sustainable mobility. The 2022 edition, entitled "Crossing The Future: Designing The New Mobility", is configured as an opportunity for discussion that brings together great exponents of the automotive industry, institutions and academia, in a multi-voice debate capable of tell about innovations and trends in the mobility of the future, with particular attention to the issues of industrial transition and infrastructures.

The Green Talk will be available on streaming on the site [1000miglia.it](https://www.1000miglia.it)
