CROSSING
THE FUTURE

Together with the 1000 Miglia 2024, the **1000 Miglia Green** is also back, a parallel event to The Most Beautiful Race In The world reserved for Full-electric cars, included Hyper-cars and Super-cars.

Crossing the future: cars built between 1927 and 1957, representing the result of the ingenuity and technological innovation of their era, alongside alternative fuel models, the future of mobility.

CROSSING
THE FUTURE

The **challenge** is unique: to travel the entire route from Brescia to Rome and back, in a regularity race, recharging within the set times and checkpoints, and finishing the parade for the public in Italy's most beautiful city centres.

CROSSING
THE FUTURE

Starting and finishing in Brescia, the route of the **1000 Miglia Green 2024** will follow the official route of the 42nd re-enactment of the 1000 Miglia, passing through hundreds of Italy's most fascinating locations.

Divided into 5 legs, the route includes a section of the race layout and additional **free transfer** sectors where the crews can handle **recharging** in complete autonomy

GREEN TALK

For the sixth consecutive year, 1000 Miglia Srl is organising the **GREEN TALK** dedicated to the topic of sustainable mobility.

A debate with several speakers that aims to build a path that sees institutions, universities and companies united by the need to act promptly and significantly in the field of electric mobility.

A space will be dedicated to car manufacturers and the growing challenges that current events are creating at Italian and European level.
